

Ajith Nayar is the CEO, and Co-Founder of CamCom, a Computer Vision (CV) platform, building the World's first industry-agnostic AI-powered Large Vision Model (LVM) for damage assessments. Ajith's vision gained from his obsession with quality and intent to make India synonymous with quality like Germany and Japan led to the creation of CamCom. The platform enabled Saudi Arabia to become the first country in the world to comply with a United Nations Sustainable Development Goal and its global footprint today includes satisfied customers in India, Saudi Arabia, Sri Lanka, the Philippines, Indonesia, Thailand, Malaysia, Germany, Estonia, Latvia, Lithuania, Greece, Austria, the UK, and Mexico.

Cutting-edge thinking and willingness to take calculated risks have shaped Ajith's career in the world of technology, an industry that relies heavily on constant change and innovation. His commitment to excellence is evident in his transparent leadership style and track record of consistently delivering quality results. An ardent practitioner of Kaizen and Lean Six Sigma processes, Ajith has the rare and precious ability to make a disparate group act as a single unit to produce the desired result.

"To me, success means leveraging experience, strategy, and a healthy dose of counterintuitive thinking to make a real-world impact. At CamCom, I work with the team by assisting them use advances in technology, applied R&D, and customised strategic services. I've been connecting technology with real-world business opportunities for more than 25 years. However, I still get excited by the challenge, which keeps me on my toes and pushes me to create better processes and solutions for my customers".

Educationally, Ajith holds an MS from the University of Delaware. He has founded a platform focused on creating a thriving entrepreneur ecosystem outside of technology in villages across India. He is a speaker in demand as a thought leader in quality and management strategy at many institutions across the globe.
